Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicant's arguments, see paper, filed 8/27/09, with respect to the rejection(s) of claim(s) under obviousness type Double Patenting have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection made below.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 25,27-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Beltramo et al. (Anandamide transport inhibition by the vanilloid agonist olvanil, European Journal of Pharmacology 364, 1999, 75-78). Beltramo et al. teach method of using N--(4-hydroxyphenyl)-arachidonylamide (AM404) to control anandamide transportation. Beltramo et al. do not teach a method of applying the composition to an individual. However, it would have been obvious to administer AM404 to an individual. One would have been motivated to do this since the preliminary in-vitro studies are followed by in-vivo studies.

Claims 25,27-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Street et al. (Slow- and Tight- Binding Inhibitors of the 85-kDa Human Phospholipase A2, Biochemistry, 32, 1993, 5935-40). Street et al. teach method of using arachidonylamide to control anandamide transportation. Street et al. do not teach a

method of applying the composition to an individual. However, it would have been obvious to administer arachidonylamide to an individual. One would have been motivated to do this since the preliminary in-vitro studies are followed by in-vivo studies.

Allowable Subject Matter

Claim 24 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art does teach or suggest the administration of the compounds in claim 24 to an individual.
